EDUCATION

Azerbaijan State Oil and Industry University

Master of Science in Artificial Intelligence

Baku, Azerbaijan

Sep. 2026 – Expected June 2028

French-Azerbaijani University

Bachelor of Science in Computer Science, Joint degree with the University of Strasbourg

Baku, Azerbaijan

Sep. 2022 – June 2026

Aspire Institute, Harvard Business School

Aspire Leaders Program

Online

Apr. 2026 – June 2026

EXPERIENCE

Data Analytics / BI Developer Intern

Azerbaijan Airlines (AZAL) CJSC

Feb. 2026 – May 2026

Baku, Azerbaijan

- Analyzed operational and financial datasets using SQL to identify performance trends, cost variances, and business issues, providing insights to support management decision-making
- Developed 10+ analytical dashboards and management reports using Power BI, translating complex financial and operational data into clear performance insights for business stakeholders
- Cleaned, validated, transformed, and reconciled data from multiple sources using SQL and Power Query, identifying inconsistencies and preparing reliable datasets for further analysis
- Analyzed 10+ financial and operational KPIs to identify performance trends, variances, and improvement opportunities, supporting management-level business decisions
- Collaborated with Strategy and Business Development, AZAL Miles, the Operational Control Center, and other teams to understand business questions, define analytical requirements, and deliver data-driven insights

President

Magnat Intellectual Games Club

Mar. 2025 – Present

Baku, Azerbaijan

- Led a 300+ member student organization, delivering 30+ intellectual events that nearly doubled member engagement and attracted 3,000+ participants
- Secured 5+ sponsorships, including Code Academy and LANDAU School, by building university and industry partnerships
- Collaborated with ASOIU administration, alumni, sponsors, and student teams to coordinate activities, secure support, and expand the club's institutional presence

PROJECTS

Airline Ticket Prices Analysis | Python, pandas, scikit-learn, Matplotlib, Seaborn

Apr. 2026 – May 2026

- Analyzed a 1.5M+ row airline market dataset to identify key factors influencing average ticket fares
- Performed statistical analysis and exploratory data analysis to assess market, route, carrier, and competition-related factors
- Built and compared statistical and ML models to evaluate fare prediction performance
- Translated model results and feature importance into actionable insights on airline pricing and market dynamics

Atlas Labs HR Analytics Dashboard | Power BI

May 2026

- Built an interactive Power BI dashboard to monitor demographic, employee performance, and attrition KPIs
- Designed visualizations to identify workforce trends, patterns, and key drivers of employee attrition
- Enabled dynamic analysis across employee and organizational dimensions to support workforce evaluation
- Converted HR data into meaningful insights to inform strategic workforce decisions
